- Customer-defined and maintained data displays
- Up to three day "look-ahead"
- Gateway services analysis and download

Terms & conditions for active user licenses

Active user pricing is based on annual subscription commitment.
 Monthly billing available for an additional 10% service charge.
 Active user licenses are required only for workstations that generate 90% of monthly transactions.
 Other workstations (regardless of the number) do not require a license.
 Active user pricing applies to transactions generated by an individual at a single keyboard. Does not apply to web servers, robots, or similar automated processes (use transaction pricing for these.)
 Active user usage above the subscription level will be billed monthly at 150% of the rates above.

Terms & conditions for transaction pricing

Transaction pricing is based on monthly billing.
 Using multiple-airport cities and/or two- or three-day look-ahead with Gold Level service is equivalent to performing multiple single transactions. For billing purposes the transaction count in these cases will be the equivalent number of single transactions.
